PROFESSIONAL SUMMARY

Full-Stack & Cloud Developer with 2+ years of professional experience building and improving web applications and cloud-based systems. Skilled in React, TypeScript, JavaScript, Python, SQL, Node.js, REST APIs, and AWS, with hands-on experience across frontend development, backend integration, cloud infrastructure, debugging, and application optimisation. Experienced in building responsive interfaces, reusable components, data-driven dashboards, AI-powered applications, and API integrations using modern development practices.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, SQL, HTML5, CSS3
- **Frontend:** React, Angular, Responsive Design, Reusable UI Components, State Management, Tailwind CSS, shadcn/ui, Bootstrap
- **Backend & APIs:** Node.js, Express.js, REST APIs, API Integration, JWT, AWS Cognito, Error Handling
- **Data:** PostgreSQL, MySQL, DynamoDB, Query Optimisation, Indexing, Recharts, Data Visualisation
- **Cloud & DevOps:** AWS, Lambda, API Gateway, RDS, DynamoDB, S3, IAM, VPC, Terraform, GitHub Actions, CI/CD
- **Tools & Practices:** Git, GitHub, Vite, Agile, Debugging, Code Reviews, Refactoring, Performance Optimisation

PROFESSIONAL EXPERIENCE

FULL STACK ENGINEER — BrandHype

Contract | Oct 2025– Oct 2026

- Worked on the development and improvement of full-stack web applications, contributing across frontend and backend functionality.
- Implemented new features, resolved bugs, and improved application performance and reliability.

- Integrated frontend workflows with backend services, maintained existing codebases, and supported application deployment and production fixes.
- Collaborated with the development team to troubleshoot technical issues, refine user-facing functionality, and deliver maintainable software solutions.

FULL STACK & CLOUD ENGINEER — Capaciti

Contract | Sep 2024 – Sep 2025

- Supported cloud-based application development and infrastructure across frontend, backend, and AWS environments.
- Developed and maintained web application functionality using React, JavaScript, and TypeScript.
- Investigated and resolved application and cloud issues to improve system stability, reliability, and performance.
- Worked with cloud services and configurations supporting application deployment and operational requirements.
- Collaborated with developers to implement features, troubleshoot defects, and improve application functionality.
- Applied Git and Agile development practices throughout the software development lifecycle.

FRONTEND DEVELOPER — Talent Match Africa

Contract | Feb 2024 – Aug 2024

- Developed and maintained responsive web interfaces using JavaScript, HTML, CSS, and Bootstrap.
- Built and refined frontend components to improve usability, consistency, and maintainability.
- Resolved frontend bugs and cross-browser compatibility issues through structured debugging and testing.
- Implemented responsive layouts and user-facing functionality across web applications.
- Collaborated with development teams to deliver application enhancements and resolve technical issues.
- Applied frontend development best practices to improve application quality and user experience.

RELEVANT PROJECTS

EFF ELECTION MANAGEMENT PLATFORM

Tech Stack: React, Angular, TypeScript, Python, REST APIs, AWS, Git

- Contributed to a full-stack platform for station management, agent management, incident reporting, audit data, notifications, and operational dashboards.

- Developed data-driven administrative interfaces using React/TypeScript, reusable components, responsive layouts, and service-layer architecture.
- Integrated frontend features with backend REST APIs supporting agents, stations, incidents, tickets, and reporting workflows.
- Built and refined dashboard and drill-down experiences for complex operational data.
- Investigated frontend and API integration issues and used Git-based workflows for collaborative development.

OR TAMBO CLIENT PORTAL & BOOKING PLATFORM

Tech Stack: React, TypeScript, Vite, Tailwind CSS, shadcn/ui, React Router

- Developed a responsive client platform covering bookings, invoices, payments, documents, profiles, packages, and dashboards.
- Structured the frontend using React, TypeScript, reusable components, and a centralised service layer for backend integration.
- Implemented loading, empty, error, validation, and responsive states across application workflows.
- Improved frontend maintainability and consistency through component reuse and structured application architecture.

AI-POWERED INVOICE BUSINESS PLATFORM

Tech Stack: React, TypeScript, Vite, Tailwind CSS, shadcn/ui, OpenAI, Supabase, TanStack Query, Recharts

- Built a business management application for invoices, quotes, proposals, clients, payments, documents, and financial reporting.
- Developed responsive React/TypeScript interfaces using reusable components, Tailwind CSS, shadcn/ui, and route-based architecture.
- Integrated OpenAI-powered workflows for generating invoices, quotes, and proposals from natural-language input.
- Implemented data fetching, caching, authentication, form validation, and backend integrations.
- Built analytics and reporting interfaces using Recharts and interactive data visualisation.

CERTIFICATIONS

- **AWS:** Architecting Solutions on AWS | DevOps on AWS: Code, Build, and Test | AWS Cloud Practitioner Essentials
- **Cloud & Development:** Google Cloud Fundamentals: Core Infrastructure | Generative AI with Large Language Models | Version Control with Git | Agile with Atlassian Jira
