PROFESSIONAL SUMMARY

Full-Stack & Cloud Developer with 2+ years of experience optimising and stabilising production web applications and AWS systems. Skilled in codebase reviews, bug resolution, security hardening, database optimisation, and scalability improvements. Proficient in React, Node.js, TypeScript, Python, SQL, and serverless AWS architecture, with a strong focus on performance, reliability, and UI refinement.

TECHNICAL SKILLS

Languages:

JavaScript (React, Node.js, Express, TypeScript), Python, SQL, HTML5, CSS3

Frontend & UI Optimisation:

React performance tuning, component refactoring, state management, responsive design, UI consistency, cross-browser debugging

Backend & APIs:

Node.js, RESTful APIs, Express.js, Serverless Architecture, Authentication (JWT, AWS Cognito), API security, error handling, workflow stabilisation

Database & Performance:

PostgreSQL, MySQL, DynamoDB

Query optimisation, indexing strategies, schema refinement, JOINS, performance tuning

Cloud & Infrastructure (AWS):

Lambda, API Gateway, RDS, DynamoDB, S3

IAM, VPC, CORS configuration, security hardening

Terraform (Infrastructure as Code)

GitHub Actions (CI/CD)

System Improvement:

Codebase review, bug identification, performance optimisation, scalability improvements

PROFESSIONAL EXPERIENCE

Full-Stack & Cloud Developer

CAPACITI | October 2025 – Present

- Resolved critical production issues and improved application performance, stability, and security across cloud-based systems.
 - Enhanced API reliability, authentication workflows, and database performance through optimisation and infrastructure improvements.
 - Developed and maintained serverless AWS solutions using Lambda, API Gateway, DynamoDB, and S3.
 - Implemented CI/CD pipelines with GitHub Actions and standardised infrastructure using Terraform to improve deployment efficiency and scalability.
 - Collaborated with cross-functional teams to deliver architectural enhancements and reliable production systems.
-

Web Developer

Talent Match Africa | January 2024 – September 2025

- Developed and maintained responsive web applications using modern JavaScript technologies and frontend best practices.
 - Resolved frontend issues, improved cross-browser compatibility, and optimised application performance and user experience.
 - Refactored reusable UI components and supported backend integrations to improve maintainability and functionality.
 - Participated in Agile development processes, code reviews, testing, deployments, and production support activities.
-

KEY ACHIEVEMENTS

- Improved application performance, stability, and scalability through codebase reviews, bug resolution, database optimisation, and architectural improvements.
 - Enhanced security and reliability by addressing API and AWS vulnerabilities, strengthening error handling, validation processes, and monitoring practices.
 - Streamlined development and deployment workflows through CI/CD automation, infrastructure standardisation, and frontend optimisation, improving maintainability and user experience.
-

CERTIFICATIONS

- Architecting Solutions on AWS
- DevOps on AWS: Code, Build, and Test
- AWS Cloud Practitioner Essentials
- The Complete JavaScript Course
